DIRECTIONS FOR USE: 8 ounces per acre

Recommended treatment is through Foliar Spray or Drench application. A stock tank may be used to dose product. Partially fill the mix tank with clean water. Add the specified amount of **STONEWALL** to the tank. Finish filling the tank with clean water to the necessary volume. The solution should be agitated during mixing and application to assure uniform suspension. **STONEWALL** can be mixed and used with other agricultural chemicals, for which such mixing is permitted by the product label. If such a mixture is planned, a compatibility test should be first conducted. Avoid mixing with quaternary compounds, Peroxyacetic Acid (PAA), or similar type broad spectrum biocides. Do not allow mixture to stand overnight or for prolonged periods. Mix well before each use. Dose 8 ounces per acre or 100 gallons of water. For specific dosage rates and frequency of treatment, contact your Account Representative.
